

TYLER MAYER
EMPLOYEE OF THE MONTH
APRIL 2008

Tyler works in the Operations Division of the Public Works Department. Tyler is always going the extra mile to help out the mechanics. Whenever his plow truck comes in for a blade change, Tyler is always there to help with the replacement. He will get on a creeper and slide under a blade even when there is snow and water running off of it.

A few weeks ago, Tyler's snowplow broke down during a blizzard. It was about 4:00 a.m. It was snowing, windy and very cold. When I (Richard) arrived at his location, I found Tyler had shoveled the snow out from underneath his truck where I needed to work. Rather than waiting in the warm cab of his truck for me to complete the repairs, he crawled underneath and held the light for me, kept my tools organized and helped remove the broken brake chamber.

Whenever help is needed and Tyler is around, you never have to ask, he takes it upon himself to lend a hand.
